Chime Master®

Digital Electronic Carillon System from Chime Master® Systems

Model
Six

Our most popular electronic carillon system dependably rings in thousands of churches all across America. The quality sound of traditional bell ringing, clock chimes and hymn playing will make a difference in the mood of your neighborhood. Designed to be maintenance-free, you will enjoy the bells year in and year out, without having to touch the system.

The Chime Master Model Six carillon system provides over 600 factory selections, playable on the following musical bell instruments (specify your choice when ordering):

- Concert Chime and Harp Bells
- Flemish Cast Bronze Carillon

MODEL SIX FEATURES

Our Five-Year Warranty covers all carillon components. A lifetime media replacement warranty protects all bell and music libraries.

The library of beautiful digital recordings of bells and music is safely stored inside the carillon on reliable digital media.

Selections include:

- Call to Worship/Mass bells
- Festive Pealing Bells
- Funeral Toll counts to 199
- Taps on bugle, for military funerals
- Prayer and Angelus Bells
- Hundreds of general and seasonal hymns, as well as music for special occasions.

Access your favorite chime music or bell ringing by title on the easy to read display. Then save it to a one-touch function button so you can activate it any time using the remote control.

Remote control features four programmable functions plus Play and Stop. Pressing Stop fades out the audio naturally.

Church almanac automatically substitutes seasonal music at the appropriate times. It remembers the dates for Easter and other seasons for each year, through the end of the century. Random music groupings allow you to select the musical style that you wish to play at any particular time.

Flexible clock striking capability can strike the hour with or without a preceding Westminster melody. Clock striking has automatic schedule priority over other ringing programs.

The elegant, clearly labeled front panel and simple programming screens intuitively guide you through setup and scheduling. The weekly schedule editor lets you play any selection at any time.

Scheduled-AutoLevel™ control with 8 volume level settings. Set it to be quiet for morning and evening, louder for high-traffic times.

Key-lock prevents unauthorized operation and programming.

The built-in speaker has its own level control on the front panel.

Automatic power outage recovery checks the schedule and clock to ensure that the system will ring only when it is programmed to ring. A ten-year battery runs the clock during a power outage. Optical isolation and transient voltage suppressors protect the system from electrical storms and power surges.

Connections

- Audio Line Output to Tower Amplifier
- Energy saving auto-switched AC receptacle for Tower Amplifier
- Audio Line Output to PA System Mixer
- AC Power Input (Standby 15W)

Carillon Control Unit Specifications

Audio Resolution: 16 bit/44.1 kHz sample rate
Clock Accuracy: ±1 Min/Yr. (0°C to 40°C) GPS sync ready
Operating Temperature: (+5°C to +35°C)
Input Voltage: 120VAC, 60Hz

Physical Attributes

Rack mountable chassis: 5¹/₄ H x 19W x 15³/₄ D (in.); 20 lb.
In furniture quality oak cabinet: 6³/₄ H x 20¹/₂ W x 16³/₄ D (in.); 36 lb.

Optional Tower Amplifier

Output Power: 530 Watts into 8 ohms, 20Hz-20kHz, 0.1% THD
830 Watts into 4 ohms, 1kHz, 1% THD
Rack mounted: 3¹/₂ H x 19W x 15³/₄ D (in.); 33 lb.
In matching oak cabinet: 6³/₄ H x 20¹/₂ W x 16³/₄ D (in.); 48lb.
